

# UCi2i FlexPort

## Virtual Meeting Rooms for video conferencing

Our goal is simple - to offer an all-in-one, affordable and fully supported video conferencing service for every type of organisation, connecting users face to face, wherever they are.

UCi2i Virtual Meeting Rooms (VMRs) bring the simplicity of consumer video calling, to the world of business-quality video conferencing. UCi2i offers unlimited usage at an affordable monthly cost - as easy to use, and as simple to buy, as your fixed mobile phone tariff. Our service is a secure, supported, high definition and on-demand multi-party video experience for use inside and outside of your organisation.

- ✓ Unlimited usage Multi-party Calling
- ✓ 1st, 2nd & 3rd line global video support
- ✓ Geo video routing for optimal call quality
- ✓ Call encryption with PIN for chair & participant
- ✓ Connects any standards based system
- ✓ Content and desktop sharing\*
- ✓ Real-time Activity Reporting App

\*If your endpoint supports H.239.

### How FlexPort works

UCi2i FlexPort service plan is the simplest way to add Virtual Meeting Rooms to your business video estate. And as the name suggests, it is incredibly flexible to your ever-changing communication requirements.

When you buy a single FlexPort - you're buying a seat in a Virtual Meeting Room and you're also getting an address to call. You decide how many seats you need as a business in total, and how many seats are allocated to each address. It's really that simple.

### Call Bursting

You can't always be certain of just how many people will show up for a virtual meeting, just like real life. We understand that you're not always going to be certain of how many seats you'll need, so that's why we allow bursting. If you have an extra few people in the meeting room, we can allow that to continue and charge you a little extra at the end of the month.

### V-Control

Included is V-Control, which is a browser based, Virtual Meeting Room management tool. It empowers users with the ability to manage multiple VMRs. At the same time, it grants multiple users the ability to easily use one VMR.
